Viewfinder App Download Process (via TestFlight)

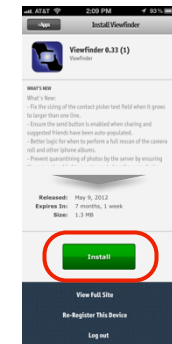

Once device registration is complete, our team receives a notification of with user's device information. User will receive notification (via email and within TestFlight app) that the Viewfinder is available for download. User is automatically included in all subsequent updates.

Via TestFlight App

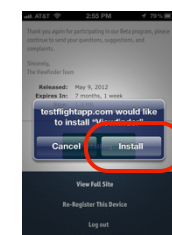

1. Open TestFlight app. 'Install Apps' interface opens automatically, and Viewfinder should be displayed. Click icon to continue.

2. 'Install Viewfinder' interface will open, providing details on the version being installed. Scroll to bottom and click **GREEN** 'Install' to continue.

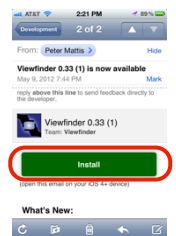

3. Popup will ask user to confirm installation. Click 'Install' to complete process. (user returns to home screen, installation begins automatically)

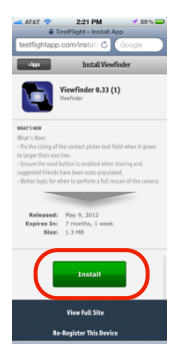

Via Email

1. Open email from Peter Mattis / TestFlight. Viewfinder app details should be displayed. Click **GREEN** 'Install' button to continue.

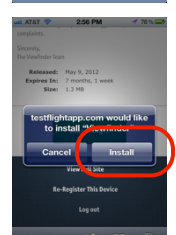

(note: button icon may not automatically display; if missing, click the 'Install' link highlighted in **BLUE**)

2. iPhone browser will open to 'Install Viewfinder' interface, provide details on the version being installed. Scroll to bottom and click **GREEN** 'Install' to continue.

3. Popup will ask user to confirm installation. Click 'Install' to complete process. (iPhone returns to home screen, installation begins automatically)
